❹ Antenna connectors   ❺ Audio out   ❻ HDMI 1.4 out

❼ USB 2.0 Type-A   ❽ VGA out

❾ Ethernet port 10/100/1000 with PoE   ❿ Power port

Installation guide

Wall mounting

❶ Drill two holes in the wall with the distance of 140 mm.
Use screw anchors if needed.

140 mm

ASTROS Station bottom view

3.3 mm   Ø 6 mm

❷ Drive in two screws.
The screw head size must be between 3.3 and 6 mm.
The screw rod diameter must be smaller than 3.3 mm.
Do not drive in the screws completely.

❸ Hang the ASTROS Station to both screw heads and slide downwards until it is fixed.

❶ Connect to a display with a HDMI or VGA cable.
If the display supports touch, also connect a USB cable.

❷ Connect the Ethernet cable.

❸ Connect a mouse.
Optional

❹ Connect the power adapter.
ASTROS Station will automatically turn on without pressing the power button.

Connect cables

❶ Make sure your laptop and ASTROS Station are on the same network.

Laptop   Station   **or**   Laptop   LAN   Station

Connect laptop to Station directly   Connect laptop to Station through organization network

❷ Type in **https:// + Station IP** in a web browser.
Station IP can be found on the information panel of the Standby Screen.
⚠ " https:// " in URL is necessary for the browser to direct to the ASTROS configuration page correctly.

🔒 https://192.168.120.11
example

❸ Type in configuration page password.
The password is **admin** by default.
⚠ For security purpose, please change the default password of your Station.
